

“Supplying world best practice mining productivity and safety solutions to an ever expanding global customer base”

Industrea Limited

The Industrea Group of companies is a rapidly expanding global provider of specialist mining services and products, with a focus on improving open cut and underground mining productivity and safety.

We build these businesses on the stable and growing platform of our successful Huddy’s mining services business.

Our diversified revenue streams stem predominantly from design and manufacturing, asset management and engineering and open cut contracting services.

The specialist range of mining products designed, manufactured and serviced by Industrea include open cut collision avoidance systems, underground methane gas drainage directional drilling systems, mobile asset tracking and driver safety performance road tools,

along with flame-proof and explosion-proof underground diesel vehicles for mine personnel transportation and longwall mining equipment.

Industrea also distributes a select range of OEM mining products for global companies including Sandvik Voist Alpine, Tagor and Pirtek.

In FY 2009 our products and services were sold in USA, South America, South Africa, Indonesia, Papua New Guinea, Australia, and to the company’s fastest growing market, China.

We have established strong customer relationships with many of the world’s largest mining groups, including BHP Billiton, Rio Tinto Coal, Anglo Coal, Barrick Gold, Vale, Xstrata and several of China’s leading mining groups including China Shenhua Energy Company, Jincheng Anthracite Mining Group and Shanxi Asian American Daning Energy Co.

In FY 2009 we employed approximately 340 full-time staff and sub-contractors in offices and/or manufacturing bases in Australia (including Mt Isa and the Bowen Basin in Queensland, Mount Thorley, Thornton, Tomago and Gloucester in the Hunter Valley and Fountaindale in the Central Coast in New South Wales), Santiago in Chile and Beijing in China.

Our group corporate head office is based in the Centenary Technology Park, Brisbane, Australia.
